

Name: Bharosa Tamang

Class: 10

School: Asmita English School.

Tour to: Pokhara

Title of study: Visit to Pokhara

Introduction:

Recently we got chance to visit Pokhara with the help of our social teacher. Pokhara is at western development Region. Head quarter of western Development region is pokhara. It is almost 200 km from kathmandu.

Objectives:

We had following objectives of our study.

1. To see natural beauty of pokhara.
2. To study the geographical structure, caves, gorge as well as rivers and Lakes.

Methodology:

For our study we applied different methods to collect the information. That is primary method as well as secondary method.

In primary method we visited ourself in Pokhara and in secondary method we got information from different people.

Finding:

We reached at pokhara in evening at 5:30 min. We found that it's like village. The beautiful scenery with beautiful mountains, lakes and other. After we reached there we went to hotel. Almost at 8 pm we went to lake side. While walking in the street of lake side the street was full of lights. Shops were well decorated and mostly people were roaming outside. Then next day we went to gorge cave, that was made up of stone. We saw David falls too. We also could also see god and goddess on wall of cave. We went to Saragkot. And we saw sun rise from there. We went to Gorkha

Conclusion :

So, after findings we came to know that pokhara is a place of heaven. It is a tourism place. The rivers, the mountains, the caves were very beautiful found in ~~out~~ one part of nepal. It is the place which attract many tourist.

Pokhara is the tourism place of Nepal. But it also have got some draw backs. It is tourism area so, it is little costly. Some place are polluted. So, if the place are protected from pollution, Pokhara can be the great place for tourism and can be developed more. So, people should be aware and conserve the area.
